Bullhorn Exhaust

<https://media.prolineracing.com/pub/PL3D/Bullhorn-Exhaust-printQty2.STL>

Ream a 14.5mm diameter hole in your body and insert it from the inside. Attach using Shoo-goo on the flange.

Slash Rear Mount Reposition Brackets

<https://media.prolineracing.com/pub/PL3D/Slash-Rear-Mount-Reposition-Bracket-printQty2.STL>

Use these brackets between your Slash 2wd rear shock tower and PL Extended Body Mounts to move the rear posts 50mm rearwards. This will locate the Secure-Loc Caps on the flat trunk surface rather than in the rear windshield. This is not required but provides a better and cleaner looking fit.
